

Breathe•easeXL is our *enhanced* nasal and sinus moisturizing spray and irrigation solution. Breathe-caseXL® is made from a Locke-Ringer's type formula, the type reported in medical journals to be the best for nasal cilia and more appropriate than normal saline. Breathe-caseXL® thins nasal secretions to clear stuffy, blocked nasal passages.

Preservative-Free & More Gentle Than Plain Saline Some nasal sprays contain preservatives that can actually irritate and burn sensitive nasal membranes and aggravate the problem. Breathe-caseXL® is a doctor-recommended pure alternative with no preservatives, iodine, or silica that can harm sensitive nasal membranes, buffered to be more gentle. Use when doctors recommend saline for relief of

stiffness and dryness - more gentle for *all* types of irrigation.

Breathe-caseXL® Nasal Moisturizer and Irrigation Solution (BEJ, at right) Economical formula, measuring spoons, and refillable spray bottle . . . **\$14.95 (\$24.95 for 2, BJD)**

Convenient Single Use Packets (BEP, left, 33/box) . . . \$16.95

Sick of dry, unhealthy airplane air? Relieve nasal dryness with our new GEL anytime, anywhere. Like our Breathe-caseXL solution, our gel has **NO ADDITIVES**. A new way to moisturize, wherever you are - just a

dab in the nose keeps you moist and comfortable for hours. The new, unique ITN (In The Nose) tip makes it simple, pleasant and easy to moisturize anywhere. Great for people in dry climates where unpleasant crusting occurs, and in winter weather. Especially valuable for keeping your nose in good health in the dry, contagion-filled environment of airplanes. Great for skiers, frequent flyers, anyone with a dry nose.

Breathe-caseXL® Nasal Moisturizer Gel (BEG) . . . \$8.95 (2/\$15.95, BEG02)
